Work Experience

Senior Quality Assurance Specialist

11/2014 – Present

Shaw + Scott @ Seattle, WA

As the first member of the QA department, **Created procedures and documentation** for testing marketing emails for various clients, including **Alaska Airlines**, **Harry & David**, and **Motorcycle Superstore**.

Worked with the development team to **implement rebranded email templates** for Alaska Airlines.

Software Development Engineer in Test

7/2012 – 6/2014

Microsoft (VMC) @ Redmond, WA

Created wrappers for automated test runs in Microsoft's Test Run eXecution (TRex) suite, updating them for use with the next version of Windows after shipping.

Managed **test scheduling** for my test areas, balancing the needs of developers with available lab resources so that **tests were run on time with minimal conflicts**.

Reported debugger breaks during test runs, including **finding and loading debug symbols** and **generating exception analyses**.

Software Test Engineer

3/2004 – 2/2009

Microsoft (Volt & Excell) @ Redmond, WA

Ran **daily automated and manual tests** for various Windows technologies, from Windows XP SP2 through Windows 7, both inside and outside of computer lab environments.

Ran daily **Build Verification Tests** (BVTs) for the Windows Media Center Extender (MCX) on the Xbox 360 for both Windows Vista SP1 and Windows 7. **Integrated** the MCX BVT test suite into the general Media Center BVT suite.

Proficiencies

Frameworks

- AngularJS
- Bootstrap
- Backbone.js
- Ember.js
- Jasmine
- jQuery

Languages

- CoffeeScript
- HTML5 / CSS3
- JavaScript
- PHP
- Sass

Tools

- Chrome DevTools
- Coda
- Git
- Grunt.js
- Hype
- Karma
- Node.js
- Parallels Desktop
- Photoshop
- Sketch
- Subversion
- Terminal (Bash)
